How to Estimate Wait Time

Indicators:

When you call, system says:

- "All agents busy, estimated wait: X minutes"
- Under 5 min = Great time!
- 5-15 min = Good time
- 15-30 min = Okay, wait it out
- 30+ min = Consider calling back at better time

Request callback:

- If wait over 20 min
- Delta calls you back (holds your place)
- Don't lose your spot

Callback Feature

How It Works:

When wait is long:

Step 1: System offers callback option

Step 2: Enter your phone number

Step 3: System holds your place in queue

Step 4: Delta calls you when it's your turn (usually within quoted time)

Step 5: Answer when called, connected to agent

Advantage:

- Don't waste time on hold
- Keep your queue position
- Go about your day
